

JAPAN DIREX CORPORATION
CORPORATE PROFILE

For over 43years,
Japan Direx Corporation (Direx) has
engineered and maintained
advanced Communications Networks,
not only within Japan,
but throughout the world.
Direx is a leader in this field.

TOPOLOGY & NETWORKING

Direx has Support Centers
and a large number of experienced technical and sales people
focused exclusively
on Communications Networks.

The company also represents manufacturers of
state-of-the-art communications products
in Japan.

DIREX PHILOSOPHY OF BUSINESS AND MANAGEMENT

Direx Philosophy of Business and Management calls for its employees to develop and exercise personal qualities and approaches based upon the following principles :

A Thankful Heart and Love of Harmony:

These qualities are central to the basic attitude essential for each of us to survive and to understand that human beings are social creatures. They are an excellent measure, and determine the suitability of our individual and collective actions in the pursuit of coexistence with our fellow humans, all living things, and the environment.

Innovating on the Known and Venturing into the Unknown:

We are all "creatures of circumstances". Every person has his own values and limitations. An individual must be provided with the opportunity to be innovative and to meet the challenges of the unknown. Experience tells us that fostering creative thinking often motivates groups to challenge convention and, working together, make the impossible possible.

This philosophy allows business organizations to operate as the interfaces between individual motivation and economic pursuits. It is our belief that with this philosophy, Direx promotes the harmonization of personal goals with business and environmental goals.

WHAT DIREX OFFERS

Our Corporate Mission:

At Direx, we don't just sell boxes—we design solutions to problems.

We focus on data and voice communications as a Network Integrator. We integrate a complete range of functions, including design, sales, installation and service. Our customer's satisfaction is our final goal.

Direx thoroughly understands the foundations of Networking for communications of information. Our networks are designed and supported by our highly trained, experienced, committed service and system engineers. It based on up-to-date technologies, without leaving the Legacy systems behind.

Our experienced staff of system engineers and designers knows what the market demands:

from standards, to strategic network planning, to the latest technical advances still in the design phase. We can explain what is needed today and a year from today, to meet the ongoing needs of our customers.

Our Business Activities:

Since 1973, the year we implemented a GE Mark III timesharing network for Dentsu Advertising Co. in Japan, we have been an explorer of engineering technologies and management services in the field of communications networks.

We have a long history with both voice and data communications products, and supporting critical communications networks. We have developed partnerships throughout the world which allow us to provide services anywhere, anytime.

In today's markets, whether you're selling in Tokyo, Dallas, or Frankfurt, responding rapidly and effectively to changing customer's demands is critical to success. At times, a product must be customized to serve a changing market. Sometimes a complementary product is required to assure success in a major application. We have the necessary experience and intelligence to make the right decisions.

Sophisticated electronic products must integrate effectively into an organization's existing communications structures. They must not only meet its technical needs- they must also meet the needs of its business mission.

Our technical staff is in constant research and development in order to satisfy the diverse needs of our various customers in markets.

*

And Now, since our foundation in 1973, Japan Direx Corporation has focused on the process and methodologies for traffic measurement, analysis and prognosis. Our analysis-based real-time network intelligence, which transforms the invisible into the visible, is our strength. Based on these technologies, we provide solutions for improving communication qualities and enhancing security dramatically.

PRODUCTS & SYSTEMS AVAILABLE FROM DIREX INCLUDE

1. Security Solution:

- 1.1 Cyber-security Solution / Owl Perimeter Solution (DataDiode)
- 1.2 Control System Security Robustness Test Tool
- 1.3 Vulnerability Management Integrated Solution / RAPID7 Nexpose & Metasploit
- 1.4 Information System Security Switch / PIOLINK TiFRONT
- 1.5 Data Protection Platform/ DIGITAL GUARDIAN
- 1.6 Website Vulnerability Diagnostic Tool/ acunetix
- 1.7 Gred Security Service/ SecureBrain
- 1.8 Next Generation Thin Client / TrueOffice
- 1.9 Control System Security / BELDEN Tofino Xenon Security Appliance
- 1.10 Host Identity Protocol Solution/ Tempered Networks HIPswitch

2. Measurement Analysis & Management:

- 2.1 Traffic Monitoring Switch / cPacket
- 2.2 Network Tap / Layer 1 Tap, IDS Tap, Multi-Link Tap, MirrorPort Tap
- 2.3 Network Simulator / PacketStorm
- 2.4 Monitor Traffic Control Switch / XX-32G
- 2.5 Service Performance Management Solution for End-to-end section / SmartSQM edge
- 2.6 Communication Network Service /
 - Network remote monitoring service
 - SLA monitoring service
 - Address & Configuration Management Service
 - Network equipment maintenance service
 - Network construction service

3. Optimization & Acceleration:

- 3.1 TCP Accelerator / ATALANTA-PEP
- 3.2 WAN Optimization & Acceleration Solution / Riverbed SteelHead, SteelFusion, SeelCental
- 3.3 Application Delivery Controller / PIOLINK PAS-K
- 3.4 Autonomic QoS Bandwidth Controller / eDIREXION
- 3.5 TCP Connection Optimization Device / TCP Connection Equalizer
- 3.6 Application Communication Control Server / NeoPro Command

4. Legacy

- 4.1 Analog Leased Line Modem / eModem series
- 4.2 On-premise Modem / eΣ mini
- 4.3 Protocol Gateway Device / NeoPro
- 4.4 Multifunction Protocol Conversion Multiplexer / NeoPro-P
- 4.5 LAN Extension SHDSL Modem / ASMi-54L
- 4.6 2-wire Analogue Dedicated Line IP Adapter / 2W-IP Adapter
- 4.7 L1 Switching System / eL1 SWS
